The New Software Cockpit for Your TOC/TN_b Analyzer

All important information at a glance, including live result display, maximum data integrity and intuitive workflows - multiWin pro makes your TOC/TN_b analysis easier, more efficient, and safer.

- **Get all information at a glance:** Enter samples and view live results in one place
- **Benefit from long-term stable calibration:** Calibrate only once a year thanks to our unique software algorithm
- **Save time with automated workflows:** Start a calibration and return to already evaluated sample results
- **Make your lab routine more efficient:** Save glassware and autosampler space - analyze one vial with two methods
- **Easily convert parameters:** Convert TOC results to COD/BOD₅, TIC results to CO₂, and more
- **Be compliant:** FDA 21 CFR Part 11 compliant module for data integrity, user management, audit trail, and more
- **Be on the safe side:** Automatic monitoring of gas tightness, maintenance intervals, temperatures, and more

Software upgrades are available for older multi N/C devices, please contact your sales representative for more information!
